Health Protocols

KEY SCHOOL
and Training Center

Revised 10/18/2023

The guidelines below outline the protocol to be followed by Key School and Training Center for COVID-19, strep and flu illnesses during the 23-24 school year. To prevent the spread of illness, staff and students are asked to stay home if they are ill or not feeling well and consult a physician.

Positive COVID-19 test	• Staff/students should stay at home for 5 days and wear a mask if they must go out. • With symptoms, they must wait 5 days and then may return after they are symptom-and fever-free for 24 hours without fever reducing medication. • Without symptoms or fever, they may return after 5 days. • Regardless of when they end isolation, if they have had a positive COVID-19 test, it is recommended to continue to wear a high-quality mask through day 10.
Strep Throat	• Staff/students may return to school after they have been on antibiotics for 24 hours, are feeling better, and are fever-free without fever reducing medications.
Influenza (Flu)	• Staff/students should stay at home until they are fever-free for 24 hours without fever reducing medications and are feeling better.
Important Information	• For the health and safety of all, please report positive COVID cases to the school nurse so that proper safety and cleaning measures can be followed. To report or for questions, please email damaki@ksfw.org or call (817) 446-3738, Ext. 118. • As with any illness, with or without fever, please make sure they are well rested and feeling better before returning to school. Staff/students with compromised immune systems are more likely to catch another illness or become run down if they return too quickly. • Reminder: To stop the spread of germs, wash hands often with soap and water for at least 20 seconds.
